Executive Summary

Bono Meme Broker is a groundbreaking meme coin project led by Bono, an iconic figure embodying the spirit of 80s Wall Street. With a focus on addressing the challenge of identifying promising micro-cap meme coins early, Bono's unique smart contract implements a 25% tax on purchases, using the proceeds to acquire and airdrop new meme coins to purchasers' wallets. The project combines innovative tokenomics, including fair distribution and community engagement through Bono's Dice Game, with a roadmap focused on key milestones such as fair launch, CEX listings, and the launch of the Bono DEX - a curated decentralized exchange designed to filter legitimate projects and drive value creation. Bono represents a paradigm shift in meme coin investing, leveraging Bono's expertise and vision to empower investors and project owners alike in navigating the dynamic crypto landscape.

\$BONO's Problem & Solution

Bono Meme Character:

Bono is an 80s Wall Steet Chimpanzee, known for his degen antics and slick Wall Street vibes.

Crypto Problem:

Bono is a revolutionary new token that solves one of the most pressing problems in the meme coin space: whats the next new micro cap meme coin that is going to explode, and how do I catch it early.

Bono's Solution

Our unique, first of its kind smart contract will collect a 25% tax on every purchase and automatically use the 25% to buy a new, micro cap meme coin from the same DEX and automatically airdrop it to the Bono purchaser's wallet.

BONO Tokenomics

Bono's tokenomics are designed to ensure sustainability and growth. With 15% allocated to the team for project development, 5% for marketing efforts, and a substantial 80% locked in DEX liquidity, investors can have confidence in the project's long-term viability and liquidity.

Team: 15%

Marketing: 5%

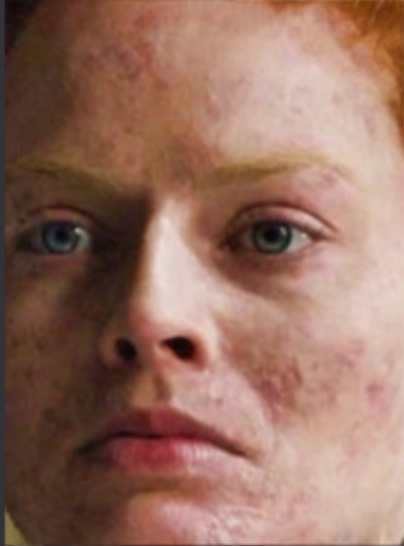

DEX Liquidity
(Locked) : 80%

Game

Bono will have one game at launch, Bono's Dice Game. Bono's Dice Game is a simple player-vs-player, play to earn dice game that will exist in our Telegram group as a thread. Its purpose is to drive community engagement through increased Telegram activity. 10% of proceeds from Bono's Dice Game will go to the Bono team.

Functionality & Roadmap

Functionality

Going from "Cheap Hooker to Blue Chip Escorts"

Exactly which micro cap meme coin that Bono chooses to purchase and when will be controlled by the Bono team. Because of this, the Bono contract will only be partially renounced, and the Bono team will retain the ability to edit the contract address of the token that Bono will be purchasing, as well as the ability to kill off tax functionality for a time period. In addition 2% of the collected taxes will go to the Bono team.

As Bono approaches later stages of the roadmap, the Bono team will fully renounce the contract and zero out all taxes.

(See roadmap below)

Phase 1 (April)

Fair Launch on Uniswap V2,
Bono's Dice Game goes live,
first pumped projects selected

Phase 2 (May)

First CEX listings

Phase 3 (June)

Bono DEX launches,
Tier 1 CEX listings
